WILLIAM CONNATSER

SOFTWARE ENGINEER
EMAIL: me@williamconnatser.com
PORTFOLIO: williamconnatser.com
GITHUB: github.com/WilliamConnatser
LINKEDIN: linkedin.com/in/WilliamConnatser

SKILLS

Languages
HTML | CSS | Sass | Less
Javascript | Node | Python
Frontend Frameworks
React | Vue | Blaze
Backend Frameworks
Express | Apollo GraphQL | Django | Flask
Databases
PostgreSQL | MongoDB | SQLite
DevOps
Linux | Docker

PROJECTS

Maze MUD Escape   tinyurl.com/yy8o447l
One week group project
React | Python | Django | PostgreSQL
- Multiplayer and interactive maze escape
game using HTML5 Canvas and WebSockets
- We were tasked to use Django, which I
had never used before, but I was able to
get a fully functional REST API and
WebSockets working in just a few days

ChallengeJS   ChallengeJS.com
One month group project
React | Express | PostgreSQL | Auth0
- Javascript coding challenge application
- Worked on all aspects of the stack
- Solely responsible for most of the backend
- Leveraged web workers to run arbitrary
code client-side and run tests
github.com/labs13-clone

Stockly   GetStockly.com
One week group project
React | Express | PostgreSQL
- Levarages sentiment analysis to predict
stock prices and view market data
- Solely responsible for all of the backend
- Engineered data caching to get around
API limit restrictions
github.com/lambda-stockly

Bitcoin Maximalism BitcoinMaximalism.com
Two month solo project
Vue | GraphQL | MongoDB | BTCPay
- Bitcoin-integrated social network
- User upvote weighting is dependent on the
amount of Bitcoins donated
github.com/WilliamConnatser/bitcoin-maxi
malism

SUMMARY

Hard-working Software Engineer who has
dedicated the last few years of his life to
becoming the best Software Engineer
possible. Fascinated with computers since
pre-teen years, channeling that natural
interest and curiosity into a profession has
proven to be a catalyst for success.
